Bikaner, Rajasthan, India

OBJECTIVE

Cyber Security undergraduate with skills in programming, web development, databases, and AI-powered tools. Seeking opportunities to apply technical knowledge, enhance practical experience, and contribute to secure, efficient, and innovative technology solutions through continuous learning and teamwork.

EDUCATION

- **IILM University** 2024– 2028
B.Tech in Cse Greater Noida, UP, India
- **Indian Institute of Technology** 2024-2025
Micro Credit Course in CSE Guwahati, Assam, India

SKILLS

- **Programming Language and DSAs:** Programming in C, Programming in C++, Programming in Python, Programming in Java, Data Structures & Algorithms
- **Frontend and Backend:** HTML, CSS, JavaScript, React.js, Node.js
- **Database Systems:** MongoDB, MySQL
- **System Design :** High-Level Design (HLD), Low-Level Design (LLD)
- **Computer Networks :** Data Communication & Computer Networks (DCN), Networking Fundamentals
- **Cybersecurity Fundamentals :** Information Security Fundamentals, Network Security Basics, Cryptography & Encryption Techniques, Cyber Threats & Attack Vectors
- **Operating Systems:** Windows, Linux
- **Tools:** GitHub, VS code
- **Additional Skills:**
 - **Soft Skills:** Teamwork, Problem Solving, Time Management, Adaptability, Critical Thinking, Microsoft PowerPoint, MS Word, Google Slides, MS Excel (Pivot Tables, Charts, Formulas)
 - **AI & Prompt Skill :** Generative AI Prompting (ChatGPT, Gemini, Claude), OpenAI API basics
 - **Collaboration Tools:** Notion, Trello, Slack
 - **Design Tools :** Figma, Canva, Framer

EXPERIENCE

- **CodeAlpha** 1st May 2026 - 30th May 2026
Cyber Security Intern Virtual Internship
 - Developed a **Basic Network Sniffer** using Python and Scapy to capture and analyze network packets, extracting source/destination IP addresses, protocols, and packet payload information.
 - Conducted a **Secure Coding Review** by analyzing application source code to identify security vulnerabilities, recommending secure coding practices and remediation measures to enhance application security.
 - Implemented a **Network Intrusion Detection System (NIDS)** using Snort/Suricata, configured detection rules and alerts, monitored network traffic for suspicious activities, and analyzed potential security threats.
 - Applied cybersecurity concepts including **Network Security, Cryptography, Vulnerability Assessment, Secure Coding, Intrusion Detection, and Security Awareness** to strengthen organizational security posture.
 - Prepared technical documentation, security reports, and project presentations while collaborating effectively within a team environment.

Key Technologies: Python, Scapy, Snort, Suricata, Wireshark, Linux, Networking, Cyber Security, Vulnerability Assessment, Secure Coding

PROJECTS

- **Supercomputer Job Scheduler Simulation:**

September 2024

Tools: C++

- Developed a job scheduling simulator for a supercomputer with 1 master node and 128 worker nodes to handle user job allocations efficiently.
 - Implemented queuing policies (FCFS, Smallest Job First, Shortest Duration First) and worker node allocation strategies (First Fit, Best Fit, Worst Fit), ensuring fair and efficient resource allocation academic interaction.
- **CommonFaculty-Student Interaction Portal:**

September 2025

Tools: React.js, Node.js (Express), MongoDB, Socket.io, Firebase/AWS S3, JWT Authentication

- Developed a centralized portal with role-based dashboards, real-time chat, and deadline conflict detection.
 - Integrated course repositories, document versioning, and analytics dashboards to streamline academic interaction.
- **Basic Network Sniffer:**

June 2026

Tools:Python, Scapy, Socket Programming, Networking Protocols

- Developed a Python-based network packet sniffer to capture and analyze live network traffic.
 - Extracted and displayed source/destination IP addresses, protocols, and packet payloads using Scapy.
 - Gained practical understanding of TCP/IP networking and packet-level communication.

CERTIFICATIONS

- **Describe cloud concepts (Microsoft Azure)**

September 2024
- **Build web apps with ASP.NET core for beginners**

September 2024
- **Python for beginners**

September 2024
- **AITools Workshop**

July 2025
- **Cyber Security Fundamentals**

April 2026

VOLUNTEER EXPERIENCE

- **Volunteer**

February 2026

Impact AI Summit 2026

- Demonstrated strong discipline and time management
 - Improved attendee experience through active support
 - Enhanced communication, teamwork, multitasking and problem-solving skills

ADDITIONAL INFORMATION

Languages: English, Hindi
Interests: Learning, Innovation, Coding, Development, Designing
